Of Poland

'Normalization'

Demands Made

By James Feron

WARSAW, Jan 1 (NYT) .- The Roman Catholic Church in Poland today published its conditions for

the full normalization of relations sought by the nation's new Com-munist leadership.

In a letter read this morning in all churches in Warsaw and other major towns, the Polish episcopate demanded several "rights," includ-ing freedom of expression and free-

### U.S. Balance-of-Payments Deficit For Year Is Put at \$7 Billion

NEW YORK, Jan. 1 (NYT).-Banking data published by the Federal Reserve Board yesterday indicated a massive 1970 deficit in the U.S. balance of payments on an official settlements basis—measuring the dollars held by foreign central banks.

On Dcc. 30, the New York Fed beld \$11.3 billion marketable government securities in custody for foreign central banks-an increase of \$233 million during the week and \$6.9 billion during the

This increase in dollar holdings by foreign governments indicated that the payment deficit on the official settlements basis would be at least \$7 billion in 1970 (against a \$2.7 billion surplus in 1969), and probably a good deal higher, since foreign holdings of nonmarketable securities—not included in this total-also grew substantially.

# Deal Seen In Senate For SST

#### Session's End **Expected Today**

By Spencer Rich
WASHINGTON, Jan. 1 (WP).—
Final adjournment of the longrunning 91st Congress is expected tomorrow. It will come if the Sen-ate endorses, as expected, a com-promise in the battle over the

supersonic transport plane.

Sen. William Proxmire, D., Wis., has apparently ended for the present his long fight against any further appropriations for the con-troversial super-speed plane, which the senator calls a wasteful and dangerous threat to the environment. The battle, however, will resume in the next Congress. Funds to be provided for the plane in the compromise will last only until

Sen. Proximire will take the floor shortly after 11 a.m. tomorrow with a lengthy review of the history of the plane. He will analyze how Senate conferees agreed to provide \$210 million for the project in the \$2.6-hillion Transportation Department appropriations hill although the Senate earlier had voted, 53 to 21, to kill the aircraft.

But then Sen. Proxmire, under heavy pressure from other senators to drop the filibuster which has blocked any funding not only for the SST but for the whole Transportation Department, is expected to allow passage of a House-approved resolution providing funds both for the SST and the department through March 30. It is estimated that the SST will get an added \$52.5 million under this agreement.

Approval of the resolution will

allow Congress to go home tomorrow and not return until Jan. 21, the date agreed upon by con-gressional leaders for convening of the new 92d Congress. Legislation setting the Jan. 21 date for the start of the new Congress was expected to be signed by the Presi-

If the \$2.6-billion funds bill does not pass before the 91st Congress automatically expires under the Constitution at noon Sunday, the new 92d Congress would have to meet immediately and try to vote funds for the Transportation Department. ITALIAN-STYLE-A Roman street yesterday morning after the traditional New Year's greeting of hurling rubbish out of the house at midnight in a good luck rite.

#### Rome on The Morning After

ROME, Jan. 1 (UPI).-Italian cities were wrapped in smoke and noise early today as citizens saw in the new year as usual-with millions of threcrackers, rockets and sparklers. The fireworks left 131 persons

injured in Rome alone.

Bottles, dishes, potted plants, glasses, old clothes and anything else householders wanted to get rid of showered down into the street, a symbolic "house cleaning" which, since pagan times, has been a feature of Italian New Year's night.

through streets ankle-de: in broken glass and debris. Officials said eight of the

131 person: injured in fireworks explosions in Rome were in "fairly serious" condition. Another 13 persons were reported injured in the suburbs.

For the first time in many years, the Home Fire Department reported, no fires were started by fireworks. Rain, which fell on and off New Year's Eve and early today; was credited with preventing fires:

Romans at the city's Leonardo da Vinci Airport, 22 miles from the heart of Rome, said the sky glowed for an hour as fireworks exploded and shot nto the cir. The noise was deafen-

ing in parts of the city.

As usual, Belgian-born photographer Rik de Sonay, who will be 72 next week, dived into the Tiber at midnight. He has done so for 50 years. In Naples, 110 persons were injured by fireworks. Police

rounded up tons of illegal ex-(Contioned on Page 2, Col. 6)

#### 44.208 GIs Killed, 293.224 Wounded In 10 Years of Fighting in Vietnam

An Authoritative Version

# **How Khrushchev Memoirs** Were Smuggled to West

Henry Shapiro, a United Press International correspondent in Moscow, has delved into the origin of the "Khrushchep Reminiscences" and how they got to the West, where they have been published widely.

From sources cultivated during a residence of more

than 30 years in the Soviet Union, he unfolds this version. Mr. Shapiro, currently in England on holiday, has written his article from London.

By Henry Shapiro

LONDON, Jan. 1 (UPD.—An increasing number of veter-an observers have come to the conduston that the "third man" involved in snugging a frag-ment of Micha S. Khrushchev's notes out of Moscow was a sonin-law of the former premier.

It was not Alexet Additions, the custime influential editor of

the government's newspaper, Izvestia, an embittered middleaged man, living an obscure and dull existence as a minor employee of the monthly illustratd magazine Sovietsky Soyuz (Soviet Union). The widespread conviction now is that the job was done

by Lev Petroy, the husband of Mr. Khrushcheve granddaughter Yulia whom Mr. Khru-ahchev adopted in her infancy and raised as his own danghter. Mr. Petrov died a few months ago. Mr. Adzimbei's relations with

his father in law in the past few years have been strained. He did not have the easy access

supreme ruler that Mr. Petrov had.

Mr. Petrov, for many years the editor of the Soviet Weekly, an English-language newspaper prepared by the Novosti agency for distribution in Britain, was Mr. Khrushchev's confident, He frequently visited his father-inlaw and heard him dictate rough notes on his reminiscence

Unlike Mr Adzhubel, the husband of Mr. Khrushchev's daughtier Rada, who lives an isolated life and never meets foreigness, Mr. Petrov. by virtus of his job, had frequent contact with English-speaking newsmen and diplomats. He spoke good English.

The small fragment of Mr. The small fragment of Mr.
Khrushchev's notes which Mr.
Petrov was helieved to have
delivered to the American publishers formed the basis of the
hook "Khrushchev Remembers" -e vast and liberally edited compliation of Mr. Khrushchev's alleged pronouncements.

An Authoritative Version

#### How Khrushchev Memoirs Got to the West

(Continued from Page 1) delivered apparently proved sufficient to give the book a ring of authenticity, particularly to the periodicals which serialized a condensation.

Whatever the popular impression may have been on the origin and authenticity of the book, the publishers significantly avoided the use of the word memoirs and made no claim that they had received a genuine manuscript from or by Mr. Khrushchey.

A Variety of Sources They emphasized that the material had come from a variety of sources, at different times and under varying circumstances.

Along with the conviction that Mr. Petrov had a hand in delivering the fragment, there is also the widespread belief that he acted without the knowledge and consent of Mr. Khrushchev or the Soviet authorities.

It is a matter of conjecture what motivated Mr. Petrov. a member in good standing of the Communist party, in committing what would appear to be an act of disloyalty to his father-in-law and his government. The following have been suggested:

Persons who knew Mr. Petrov have said that he had been deeply resentful at the way the Kremlin treated Mr. Khrushchev in reducing him to the status of an Orwellian "unperson," and he wanted his fatherin-law's restoration to a proper place in world history.

Mr. Petrov had some misgivings at the cessation of the campaign of de-Stalinization and the possibility of the "rehabilitation" of Stalin.

. He was suffering from incurable cancer of the kidneys, knew be was dying slowly, and raced ogainst time to make his contribution to what be considered a case of correcting a historic injustice.

Not the Soviet Regime

Knowledgeable observers be-lieve the Soviet government and/or any of its agencies or officials had no hand in the matter.

No one has suggested a plausible way in which the Kremlin could have benefitted from the sensational revival of a painful problem-Stalin's misdeeds-especially on the eve of the 24th Congress of the Communist party, scheduled for this March.

The Soviet leaders would just as soon forget, and are doing their best not to be reminded of, Stalin's despotism and cruel-

ty.
Publication of the material has been denounced in the Soviet press. The Soviet Foreign Ministry took unsuccessful pains to persuade Western periodicals to discontinue serialization after the first installment appeared. Given the extraordinary concentration of propaganda power in Moscow, no medium-level official or agency could have approved the delivery of any of

Mr. Kbrushchev's material with-out authorization of the ruling It is difficult to imagine, if not inconceivable, for an individual high official to have been involved clandestinely in the affair unless be were anxious to commit political hara kiri or worse. If be had done so,

It would have been known by Could Have Written Part

Observers who have seen the agree that Mr. Khrushchev could have written much of it. But there is also much that be could oot have written.

They have in mind not so much those numerous errors of fact, which could be explained on the ground of old age or faulty memory, but the style, the manner of handling, which seem to have been with an eye for the Western market.

If Mr. Khrushchev himself wanted to have his notes published, observers believe, he was interested primarily in the Soelections will be held in 1971 viet reader. He would have reafter voters approve in July a quired careful Soviet editing, and he would have missed the new constitution and elections law.

material be made public only account of the arrest of secret after his death. Whatever violence Mr. Khrushchev may have done to some facts, it is inconceivable for him to have said, as the published material did, that be was born at Kalinovka, in the Donetz

Kalinovka happens to be a village in Russia, close to the Ukrainian border and hundreds of miles away from the Donetz

Nor does the book, which basically reports Mr. Khru-shchev's views fairly accurately, report essentially new material. Virtually everything it contains has appeared in print either in the Soviet Union or abroad, or was uttered by the irrepressibly loquacious Mr. Khrushchev in his contacts with foreigners at innumerable times. Take for example the book's

police chief Levrenti Beria. Mr. Khrushchev himself told the story to foreign audiences at least twice, once to Gen. Charles de Gaulle and his entourage when the former Soviet premier visited France. Mr. Khrushchev repeated the story in even greater detail to a group of Western Communist

leaders, delegates to the 22d Communist party congress in This correspondent reported an account of the Beria arrest, common knowledge in Moscow, although never published there, in the early 1960s,

Barring the fragment of ma-terial that Mr. Petrov smuggled out, the book in Biblical paraphrase may be described thus: The voice is largely the voice of Khrushchev but the hands are somebody else's.

News Analysis

Record of the 91st Congress

For long periods of time. Mr. Nizon seemed to lose a per-sonal as well as political rapport with Congress, even with members of his own party who privately grumbled over the isoletion of the President. At times, such as during the campaign, Mr. Nixon-and more particularly, Vice-President Spiro Agnew-seemed intent on declaring political war

on the Senate. Toward the end of the Congress, however, Mr. Nixon made a seemingly deliberate attempt to re-establish a rapport with individual members of the Senate, to the point where he created an unpublicized personal working relationship over the breakfast table with Sen. Mike Mansfield, the Senate Majority Leader.

This presidential effort helps explain why, after all the acrimony of the campaign, the post-election lame-duck session did not turn into a political disaster, as had been freely predicted in advance. With a minimum of politics, the lameduck session succeeded in pass-ing two significant pieces of legislation—the occupational safety bill establishing federal regulation over working condi-tions and a bill providing protection for investors against the failure of brokerage houses,

Final Days If the Congress got into a tangle in the final days on various appropriations bills, it was not so much because of a challenge to administration legislation as because of a Senate challenge to the ways and powers of the House and Senate appropriations commit-

Aside from the foreign policy struggle between the White House and the Senate, the one basic, continuing issue that developed between the Democratic Congress and a Republican administration was over the question of domestic and economic priorities. It was be-cause of this issue that a partisan confrontation started to develop, only to recede in the closing months of Congress.

With the vowed objective of shifting priorities from military to domestic needs. Congress this year cut \$2 billion from what the administration had insisted was a "rock bottom" \$66.8 billion defense budget.

At the initiative of a bipartisan group in the Senate, Congress rejected administration proposals to start expanding the Safeguard ABM system into an anti-Chinese area defense system. It was the first time in postwar history that Congress had rejected a major weapons proposal of the Pentagon. In the ABM fight that lasted through both sessions, the administration, however, did emerge victorious with an ABM system to defend the Minuteman missile bases.

#### The Congress Moves to Reassert Its War Power

Final approval of the Cooper-Church amendment could prove to be one of the most significant acts of the 91st Congress. After a long struggle, mostly in the Senate, Congress has written into the law restrictions on the authority of the President to use American ground forces in Cambodia. Similar restraints as to Laos and Thailand had been incorporated in the Defense Department appropriations bill a year ago Now, however, Congress is saying to the President that he must not do in Cambodia what he did last spring, unless he obtains specific legislative authority.

In the eyes of its sponsors, this amendment has two basic purposes. First, it is designed to establish the joint responsibility of the President and Congress for commitment of American forces to battle. Second, it is a legislative attempt to limit the war in Southeast Asia and thus hasten its termination. According to Sen. Church, it is the first time in our history that Congress has attempted to limit the deployment of American troops abroad in the course of a

A possibly damaging crunch over constitutional powers was averted when the Nixon administration accepted this limitation on its operations in Southeast Asia. The House too retreated from its earlier demands for a compromise that would have drained most of the meaning out of the Cooper-Church restriction. As the conference report on the supplemental foreign aid authorization bill was finally adopted, the statutory restriction against the use of American troops and advisers in Cambodia stands without a modifying proviso. The House did insist on qualifying language in the Defense Department appropriations bill in regard to the use of U.S. funds to finance possible incursions into Cambodia by South Vietnamese and other Asian troops. The compromise means that U.S. funds may be used for this purpose if the President is prepared to say that this is necessary to the safe, orderly withdrawal of American troops from Vietnam or to aid the release of American prisoners of war. But this diluting language does not touch the prohibition in the supplemental aid bill against use of American ground forces or advisers in Cambodia,

What confusion remains in regard to the law is related to the undefined constitutional authority of the President to protect American troops in the exigencies of war. Everyone involved in the debates seemed to agree that the President has substantial power in this sphere that would remain untouched by the legislation. Even Sen, Church con- is that Congress has put its hand to the a concentration of enemy strength just over the border in Cambodia might fall within the prerogatives of the commander in chief if the enemy concentration constituted a grave and imminent threat to American

forces. But he insisted that "this language would clearly prevent the deployment, for an extended period of time, of a substantial number of American troops in Cambodia."

This moderate and rational view of what the Congress was doing seemed to satisfy the Senate, although widely divergent views as to the latitude left to the President still persist. It is evident that Congress can never fashion iron-clad rules for the limitation of military activity, but in this instance the two houses have agreed on limited restraints that the President could violate only at his peril. Congress has exercised its own unquestioned constitutional power to control the purse-strings. Even though the mandate remains somewhat nebulous, the President could not ignore the meaning that bas been supplied in the debate without risk of a furious fight in Congress and the country and possible impeachment.

Congress wrote into the law another proviso to the effect that the aid the United States is giving to Cambodia shall not be regarded as a commitment to defend that country. If the will of Congress is respected, Cambodia cannot become another Vietnam. Congress has expressed its willingness to take the risk involved in limited aid, while insisting that the United States not be lured deeper into a bottomless bog because limited aid may not prove effective.

It is quite possible, therefore, that this bid on the part of Congress for restoration of its war power may be, as Sen, Church called it, "a historic moment." As a result of it future Congresses may insist on a more positive voice in any commitment of American forces to battle. Let no one suppose, however, that the fight for responsible, democratic controls over war-making has been won. Nothing that Congress bas done touches the commitment of air units to combat in Cambodia, Laos or Thailand. There appears to be little ground for hope that Cooper-Church will be applied to the sort of clandestine military advisers who bave been operating in Laos under civilian cover. And of course these limited restrictions would last few weeks he has seemed have no force of law if a new crisis should arise outside of Southeast Asia.

Bent on its own approach to a grave constitutional problem, the Senate gave no satisfied with the state of our afheed to the House resolution designed to fairs. require the President to report to Congress What is the explanation of this when he uses the country's armed forces in sense of uneasiness? It is clearly a foreign land without congressional authorization. This useful proposal might well be policy. He is the target of the a focal point for the next step in restoring public's frustrations, but not the Congress to its rightful role in war-making. cause of them. ceded that a sudden and limited strike at plow. It has re-established its right to participate in the commitment of the country satisfied with our politics, but that to war. But the controversy over the mean—we are dissatisfied with ourselves, ing of its present action is indicative of the great distance yet to be traveled. THE WASHINGTON POST.

#### Wisdom in Moscow

The Soviet government has blended wisdom with compassion in commuting the death sentences against two defendants in the Leningrad skyjack case and in reducing the prison sentences of some of the other convicted persons.

Moscow'e change of heart was no doubt influenced by the worldwide torrent of protests the original sentences had evoked and also by the example of mercy Generalissimo Franco had set a day earlier in the case of the condemned Basque esparatists. It is encouraging that the Kremlin has now acknowledged the need for paying attention, in some cases at least, to the sensibilities of the civilized world

Stalin, it may be recalled, showed no similar sensitivity, much less receptivity, to the global calls for clemency for Bukharin, Zinoviev, Kamenev and other old Bolsheviks unjustly convicted and executed during the terrible purges of the 1930s.

Unfortunately, not all the issues raised by the Leningrad trial and related matters have been resolved even by the leniency now

displayed. The world does not know, for example, the fate of Lt. Vulf I. Zalmanson. who was turned over to military authorities for court-martial after being arrested with fact that power, muney, and inome 20 other Jews in Soviet prisons and a subversive thought in the U.S. scheduled for trial, reportedly on charges of being involved in some way with the Leningrad group. The fate of all these individuals remains of concern to world

The most basic issue of all, of course, is beyond the competence of any Russian court. wages and prices policy to combat The planned hijacking was an act of desperation by Soviet Jews who had tried fruitlessly to leave the Soviet Union through legal means. There is every reason to suppose that the Soviet Union has other citizens -Jews and non-Jews alike-who share a desperate urge to emigrate. So long as they are kept against their will, they will try to find a way out, however dangerous. Sooner or later Moscow will have to change its policy and unlock the door.

THE NEW YORK TIMES.

#### International Opinion

Qualified Joy

Russia ushers in the new year with an act of clemency that is greeted with worldwide acclaim. It is true that most prisons are ugly places and that the Spanish and Russian varieties have grim reoutations. So there will still be great concern in the West

about the prospects of the prisoners whose lives have been spared. But there lies the reason for qualified rejoicing. Lives have been spared. By the hardest anthoritarian regimes of Right and Left. Under pressure from the voice of free public opinion in the

Seventy-Five Years Ago

Fifty Years Ago

January 2, 1896 PARIS-All who have visited the Transvaal will recognize that the assertion of the majority of the English residents in that country that they meant to respect its independence and only saked for extended privileges is perfectly sincere, but the action of Dr. Jameson, though desired and instigated by irresponsible agitators, justifies all the suspicions entertained by the Boers against foreigners.

January 2, 1921 WASHINGTON-The League of Nations issue shows signs of life through the fact that a disarmament conference is likely to be called by President Wilson. It is learnt that the President contemplates calling such a con-ference either under the authority of the Naval ference either under the authority of the Naval American assumption that we can Appropriation Act of 1916, or through the do "anything." Washington has disarmament committee. It is thought that the conflict between these two choices may reopen the discussions on the League of Nations, out pointless delays and bhinders.

### Once More Around the Sun

By James Reston

Washington. This is the main

thing that is really missing. The

Johnson years produced a disaster of doubt in this city, and the

administration, from the invasion of Cambodia to the end of the

election campaign, have added to

Advertising Not Enough

recy and trickery of the Nixon

WASHINGTON. - Precident Nixon is going into the third quarter of his term with a slightly different team, a revived political opposition, a troubled electorate, and the same old problems. In the calmer and most conciliatory, yet he must be aware at the beginning of 1971 that many people who wish him well are still anxious and dis-

something much deeper than ques-tions of presidential style and

sense of regret or sense of loss to

It is not merely that we are disas if our gods had falled us, or vice versa. Most of us have no reason to complain about our standard of living, but everywhere people seem to be complaining about the moral standard of our lives. What we have gained on the surface has not quite made up for what we have lost at the heart.

Beyond Our Reach Aside from this disenchantment with the pursuit of happiness, we have also run into the awkward and that there are a lot of things beyond our control in the world. Nixon's influence in Moscow and even in Jerusalem is not unbounded. Unlike Prime Minister Heath in Britain, who has a disciplined party

majority in the House of Commons,

he cannot insist on an effective

Accordingly, there is a feeling in the U.S. and not only in Washington but in Wall Street and on Main Street-of being trapped in problems beyond personal control, of not knowing what to do about the Russians or the Vietnamese, prices and wages, parents and children, but still feeling that, dammit, the President ought to be able

to do something ebout all this. It is an outrageous but not wholly unnatural feeling. Where else to turn? In an increasingly secular society, the President has a better chance than anybody else to define the problems of the age, to put them in the perspective of history, to articulate the vague doubts, yearnings, and ideals of the people, and to set the course and priorities

in the new year.

The third quarter of Nixon's term is perhaps the last chance in his elected span to do this, for a year from now he will be coming up on the presidential primary elections, and the chance then for a new beginning in a favorable po-litical citmate will be gone.

Thus, what he is preparing in the budget, in the State of the Union, the State of the World, and other messages is far more important than what he said in the recent elections and can, if done with clarity and conviction, wipe out the unhappy memories of the electoral campaign.

Nobody, of course, expects him to dispel the fog in a blaze of tambic pentameter, or startle the new Congress into wisdom by next Tuesday. From the old optimistic sunk to the equally silly assumption that we can do nothing with-

But one thing could be done the idea that good morals are good before this new year is out. The President could restore a sense of politics. integrity to the political debate in

not only the Congress and the press but the officials of the government have been wondering what's going on. They have been reading presidential statements and wondering skeptically what was back of them, what did he really mean, what was really behind all This is what has been poisoning

the atmosphere of mistrust and the political atmosphere here not that the problems were insumble, Nothing important the President wants to do can be imposed by though well they might be, but the President on a Democratic that you couldn't see the problems for the tactics and the tricks. Removing this corrupting doubt Congress through the exercise of brute political power: Therefore, there must be candor, trust, and may very well be the first problem

No combination of advertising techniques-no matter how effective in electing a President-can enable a President to govern effectively in America signinst a questioning Congress and press: Therefore campaign advertising techniques are a barrier and not a boon to the President's program. And the opposite of this is also true: No combination of opponents in the Congress or the press can easily frustrate the will of a Presi-dent once he establishes an atmosphere of integrity and gets the trust of the people: Therefore the majesty of his office and the power of his character are the most ef-

It may be that nothing would be more original, and maybe nothing more effective, in Washington after the last six or seven cynical years, than an experiment with

fective forces in American political

#### etters-

On Abortion

In the past Western society considered armed attacks on pregnant women and sacrifice of infants to the gods as examples of barbarism wherever they occurred. Today, despite the Civil Liberties Union, the SP.CA, etc., little or no pro-test greets the news of the premeditated death of 25 babies born alive in ultra-modern New York State since July 1; 25 babies who were born to die. No organized protest—no government asylum for these babies simply because it was the mother of each baby who decided that her baby should not live. Well now, that explains every-thing, doesn't it?

JAMES R. RENICK. Dijon, France.

Courageous Decision

The courageous action of the West German judge Fritz Hertlein (DET, Dec. 18) in granting asylum to Negro Sgt. James Henry Grant, of the U.S. Army stationed in Europe, is to be highly commended. Especially significant is the wording of the court's statement that "such racial discrimination as Grant experienced is illegal in this country, and that qualified him for asylum." One can hope to see a day in which any country is willing to grant asylum to persons "illegal-ly" persecuted, according to that ntry's understanding and definition of legality. It is further noteworthy that this judgment was given in Germany, since it is not so long ago that members of my race. among others, were seeking asylum (and in many cases being refused) from persecution in this country. ALLEN HIRSHFELD.

Behind the Cabinet Shifts

# The Divisions of Gaulle

By James Goldsborough

Pompidou and Prime Minister Jacques Chaban-Delmas are being billed as routine business to fill two vacant posts, but much more is really at stake. The changes represent weeks of

tedious negotiations between two dominant Gaullist factions, each one bent on increasing its power in the politically important months to come. Each faction sees in the passing of Gen. de Gaulle and in the approach of both mu-nicipal and legislative elections a time when it must increase its influence or risk losing it all

The critical decision was made by Mr. Pompidou when he decided that this was not the time for a major government overhaul. Though many people do not ex-pect Mr. Chaban-Delmas, Foreign Minister Maurice Schumann or Finance Minister Valery Giscard d'Estaing to last much past the legislative elections of 1973, Mr. Pompidou has ruled that this was not the time to change them.

The most important of the changes which will be announced Tuesday is the replacement of centrist Jacques Duhamel, a mod-erate and a "European," at the Agriculture Ministry by Gaullist Jacques Chirac, Mr. Duhamel will move over to the "easier" Culture Ministry to replace Gaullist Edmond Michelet, who died three months

EEC Policy Involved Officially, Mr. Duhamel, who is recuperating from an automobile accident, is moving over for health reasons, but he is known to have disapproved of his government's rigid approach to the Common Market's Werner report on monetary and economic union last month. At least at the Culture Ministry he won't have Brussels to worry about

Mr. Chirac, a rising young po-litically minded Gaullist who has been Mr. Giscard d'Estaing's undersecretary et Finance until now, should have no difficulty accepting French Common Market policy.

It seems unlikely now that former Fourth Republic Premier gar Faure will be brought into had been expected. Mr. Faure, who many think is the most likely. candidate to replace Mr. Chaban-Delmas after the 1973 elections, had wanted the Culture Ministry post that went to Mr. Duhamel, and informed sources think it is unificely he would get the other available post the Transport Min-istry, left vacant when Raymond

longer worry over what their general thinks. Nonetheless, the Gaullist purists, like the Spanish Palange, feel movement away from

PARIS, Jan. 1.—Changes in the french cabinet decided today tionalism to Europeanism. They over lunch by President Georges are desperate lest they eventually fundidum and Prime Minister find themselves little more than

A Short Divergence

One illustration of this came during a cabinet meeting last month on the Werner report. There was a sharp difference of views between Messrs. Giscard d'Estaing and Duhamel on one side, and Defense Minister Michel Debré on the other, with the first two not sharing Mr. Debré's heated opposition to the report's call for a new semi-antonomous Common Market body to coordinate eco-nomic activity.

It must be remembered that neither Mr. Duhamel nor Mr. Giscard d'Estaing is a Gaullist party member, but they are in the government thanks to Mr. Pompidou's policy of broadening the majority.

Add to this that Mr. Chaban-Delmas himself is closer to the Giscard-Duhamel view on EEC matters than Mr. Debré, and if becomes apparent that the purists, like the Falange, have reason to

For the moment Mr. Debré is still acknowledged as the most influential member of the gov-ernment, but this could conceivably changed by the coming elec-

In planning for both this year's municipal elections and the 1973 legislative elections, Mr. Chaban-Delmas takes a markedly different approach from that of the Debré group. For Mr. Chahan-Deimas the legislative elections especially will prove the success or failure of the policy of opening Gaultism to the center and even the left, and will determine largely whether he leaves his post with some chance of succeeding Mr. Pompidou as the 1976 presidential candidate, or whether he leaves in semi-disgrace.

The importance of the Chaben-Deimas policy is not just whether Gaullism moves toward the left or protects its right as Mr. Debré would have, but in shaping French and European foreign policy as well. The French center and center-left tend to be the "Europeans" in France, and an opening here will determine whether France remains ever the reluctant member of the Six or whether it regains a certain pre-Gaullist enthusiam for the community.

For the moment, then, the government changes only slightly, with Mr. Pompidou careful to maintain the balance among Gaullists, Giscardists and centrists. The big changes will come when it istry, left vacant when Raymond becomes apparent that Mr. Chaban Delmas has lost too much ban Delmas has lost too much Gaulist support, when Mr. Gisdivides Gaulists here is not unlike card d'Estaing needs room to the one that has divided the Spanish government in recent months, Mr. Pompidou in 76 and when except that the Gaulists must no Mr. Schumann finishes his sixmonth chairmanship of the EEC's council of ministers which starts today. letter to The Times of London. One year they showed a film of a His embject was the daily crossword puzzle, of which The Times by then had published 12.468.

"This morning in a station waiting room," be wrote, "I completed number 12,468 in 4-1/2 minutes. I should be most interested to know whether this time has ever been bettered. If there is no challenge from your readers, I propose to submit it as a record." To an American, Mr. Dean's

claim was staggering, for The onds with a word that bore some Times crossword is a mass of rational association to the first maddening puns and in-jokes. "Far from benign in a saint of such as tenels, elbow; foot. The citrus associations," is the clue, the winning words were ely ones that word turns out to be "inclement."

Why? You have to know the old nursery rhyme about St. Clement Dane's Church in London: "Oranges and lemons say the bells of St. Clement's." Or try "distraught intent air of

Melmoth for instance." The answer is "itinerant." Why? "Intent sir" is an anagram of the answer. And there was a Gothic novel by Charles Maturin called "Melmoth the Wanderer." In any other country Mr. Dean

might have had his tongue in cheek, but the English take their puzzles seriously. A comple of days later Mr. Dean went on the BEC and under the broadcasters' eyes, did The Times crossword in 3-3/4

The Hishop of Ripon wrote to The Times to say that he did not envy Mr. Dean, "I am glad," he said, "that I have never completed-nor see any likelihood of my completing-your crossword puzzle in 4-1/2 minutes, I should be at such a loose end for the next 23 hours 55-1/2 minutes."

From the Rectory Then there was e religious note from Mrs. Elizabeth Vansbrough of the Old Rectory, Broughton Poggs, Lechlade, Glos. She wrote: Monsigner Ronald Knez, with whom I often d'd the crossword and toen guess the 'downs' before locking at the clues. He also always gave up doing the puzzle in Lent, as a Penance." There is certainly something

about the English and puzzles. It must be their computatively verbal cuality. They love words, perhaps. especially the upper classes. It may have something to do with traditional education at the greatprivate boarding schools, with all the emphasis on rhetoric and

# Once-Banned Play in 'Admirable' Revival

By John Walker

LONDON, Jan. L - George Bernard Shaw's "Mrs. War-ren's Profession" has been admirably revived by the National Theatre at the Old Vic. "Impeccably directed by Ronald Eyre and excellently acted, the play, written in 1894, is made to seem much better than it is. Although it now seems incredible, the play was banned in Britain until 1925. When it was first performed in New York in 1905, the police arrested the actors, who were later acquitted. In Kanses City, the authorities ran the company out of town by giving the actors the alternative of being arrested for indecency or leaving. Equally strange now are Shaw's own complaints that, while his work was banned, theaters were presenting plays that were pornographic and aphrodisiae. What can he bave been referring to?

Mrs. Warren. of course, followed the oldest profession. Shaw's main argument, that women were driven to prostitution through poverty, forced by economic necessity because the alternative was drudgery, has lost much of its force. I doubt whether anyone now watches the play and feels guilty, as Shaw wanted.

He anticlpated this critical objection. In a posteript to his preface to the play, added in 1933, he wrote: "It is amazing how the grossest abuses thrive on their reputation for being old unhappy far-off things in an age of imaginary process."

LONDON DEBUT-Eartha Kitt made her first appearance on the English stage Friday night as Mrs. Gracedew in Henry James's comedy "The High Bid," at the Criterion Theatre. The butler is Charles Carson.

Mr. Eyre has sensibly put the emphasis elsewhere, on the clasb between mother and daughter, on the worldly Mrs. Warren, full of self-justification and gratification, expecting love from her daughter as a right, and Vivie, educated but unknowing, cutting herself off

from her emotions. The subject has become the blight of love, the damage one generation un-

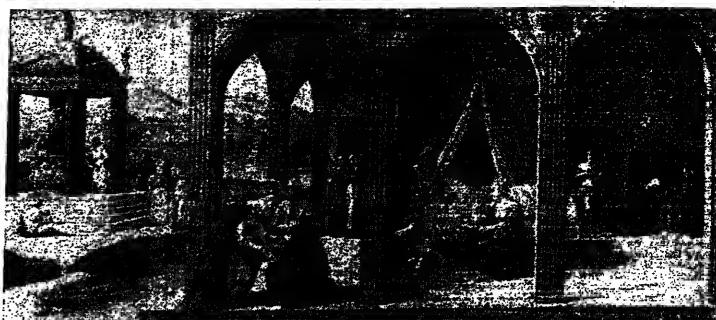

withingly does to another.

Shaw carried through the implications of his theme with gusto. His young man is not a romantic hero, but a silly, idle charmer. His artist is a senti-

mental fool. His clergyman is a social climber and a hopeless father. The social and business world is represented by a baronet who not only finances Mrs. Warren's chain of brothels but talks endlessly of maintaining the standards of decent society. The cast is quite splendid. Coral Browne, making her debut with the National Theatre, is a magnificent Mrs. Warren, ber voice varying between a seductive purr and a vulgar rasp. The confrontations between her and Sarah Badel's lively Vivie Warren are especially effective. Bill Fraser, oilly nasty as Siz George Crofts, Edward Hard-wicke as Praed and Paul Curran, as the ineffectual Rev. Samuel Gardner, all contribute telling character studies, while Ronald Pickup makes Frank Gardner, the young lover, simultaneously charming and venal Other recent London open-

#### The Art Market: What's Behind Record Prices

By Souren Melikian

LONDON, Jan. 1.—As the now well-established custom would have it, the two major English auctioneering firms, Sotheby's and Christie's, have just published their sales records from Oct. 1, 1969 through Oct. 1, 1970, in Juxurious book form.

These books are indispensable reference works for every collector, dealer and auctioneer. Their purpose being to advertise auctioneering feats, the two firms tend quite naturally upon world record prices. And, indeed, a good many records have been shattered during the past auction year. The much talkedabout \$5.5 million paid for a Velasquez portrait is but the latest of an impressive list of incredible sums paid for old masters. Impressionists and modern masters. However, in this flurry of figures one could easily loss sight of the point for, in the two figures, one could easily lose sight of the point for, in the two books, the records are given without definition of the circumstances under which they were broken or a hint as to why they were

My feeling is that, in nearly all the cases, these huge sums were paid because the works were either unique or especially glamorous because of former ownership. Thus the record prices were often necessarily unrelated to what is happening on the day-

to-day, humdrum art market.

Take for example, a Sotheby record which is truly splended and, in addition, a tribute to the firm's skill. On March 18, 1970, \$528,000 was paid for a painting of a cheetah with two Indians by George Stubbs, done around 1765. This is a world record for a work by any British painter. But some consider the painting to be the finest animal scene in existence by the finest animal painter in British annals. Significantly, the painting was bought by Agnews, the London firm dealing in old masters, on behalf of the Manchester City Art Gallery. In other words, it was not a private bidder e affair. The same is true of another picture by the Italian Renaissance master Francesco Granacci, a close friend of Michelangelo's. This painting was sold for \$192,000 on June 24, 1970.

Agnew's bought it-for the Metropolitan Museum, New York. Of course, not all the records were set by museums. But simpet all the works of art that made record prices will doubtless end up in museums and probably within a short time. A Hans Baldung Grien that made \$537,000 on Dec. 3, 1969 is now unique in the world market (a dealer bought it, obviously for resaic.) A Giovanmi Paolo Panini sold for \$50,000 on Feb. 12, 1970, ranks among the ten top pictures by this 18th-century Italian landscape pelmer. And I cannot remember seeing a more beautiful Samuel Scott than "The Building of Westminster Bridge" (1749) from the collection of the late A Stewart Walker of New York City. It has an ethereal luminosity that made landscape painting of the 18thcentury one of the greatest forms of European figurative art, a fact that is reflected in the world record price of \$96.000.

#### Christie's Records

Turning to Christie's list, one sees the general impression confirmed: The highlights were all outside the ordinary sphere of commercial transactions. Jacopo Bassano's "The Flight Into Eg. pt" fetched \$655,200 and went to one of the world's richest collectors, Norton Simon of Los Angeles. Christie's expert writes that "hitherto Bassano . . . bad never excited much interest in the salesroom." Fair enough. This merely means that the conventions of recent years are going out of fashion and that a masterpiece is now recognized as a masterpiece even if it has not gone down as such in elementary art history textbooks. This applies not only to Bassann but also to Samuel Scott and George Stubbs-who would

have dreamt of such prices—even of a tenth of them—say in 1960?

Again and again the some reasons account for all the top prices paid for objets d'art in the past season. A 17th-century silver inkstand "almost certainly by the Antwerp silvershi'h Christian van Vianene" (in Christie's own words) fetched \$187,000 -an absolutely stopendous sum. But it is also fair to call it an absolutely stupendous object, unmatched by any other piece of Flemish or Dutch silver made at that period. So, as Christie's very aptly wrote, "how does one value in hard cash something

Another case in point: On Oct. 12, 1970, amazed outsiders heard Christie's noted director and expert in Chinese 27t, Anthony du Boulay, calling out the bids for a Chinese Tang ewer. It finally sold for \$60,300, the record for Chinese Tang pottery. At the same sale, the absolute record for pottery was broken with a \$225,000 bid for a Sung vase that once belonged to the imperial family of

Part of the reason might bave been surmised from a look around the room. It was full of Orientals, Mr. du Boulay, instead of calling out the bids briskly, was deliberately slow and, for the first time ever in British anction history, one could hear bidders converting pounds sterling into Japanese yen-and once or twice even bidding in Japanese. This was the result of a very clever sixmonth campaign that had been staged by Christie's in the For East. Thus the top Japanese dealers and museum curators were in London for the sale. The Tang ewer that fetched the record price can be compared to only one other piece in Japan—this latter is a vase classified as a "national treasure" which illustrates

The lesson to be drawn from these selected examples is that the record prices in London this year were paid, on the whole, for objects that are literally priceless and thereby not affected by ordinary market conditions. The records cannot conceal what is, in fact, the rather blenk situation of the world art market.

Foreign Markets The two books also reveal another espect of London dealing,

London, the rest to organize sales in Geneva (7), Montreal (12), Ottawa (10), Houston (1), Australia (3) and Tokyo (1), Mr. Herbert's concluding words should not fail to make in

# Dubbing for the Movies-It's 'Poetry of a Special Kind'

By Ann Geracimos

PARIS.—It's early Monday morning in the Studio Avia, a small darkened basement room on the He St, Louis where even the ashtrays are carpeted against noise.

Seven people have gathered for the first of a three-day "sync session" to convert the Prench movie, "La Modifica-tion" idirected by Michel Worms, from a norel by Michel Butor, starring Maurice Ronet, Emmanuelle Riva, and Sylva Koscina) into English with the title, "A Change of Heart," Except for the mysterious role of "author" also dubbed, the story is a conventional onethe eternal triangle, a wife in Paris, a mistress in Rome, and which one will the husband choose. (Right the first time.)

Dubbing director, Carol Sands. has spent the last month on the script translation, chosen the cast, without the usual voice tests, and will see the production through final editing the next week. Studio rentals are \$400 a day: pressure is high to finish the 100-minute film. Tha director complains she has got two styes doing the job; Magglo Brenner, the actress playing take Vitamin E. Coffee arrives from a local cafe: so actor leaves carly to go to the bank.

By Clive Barnes

NEW YORK, Jan. 1 (NYT).-

Bed, they say, is a great leveler. For her first profes-

sional play, the actress Shelley

Paris dubbing facilities, it is generally agreed (naturally by the people in Paris), are among best anywhere-they are relatively less expensive, the esprit de corps is greater, and the technicians are better, for, being French, they are automatically film buffs. Business fell off during De Gaulle's anti-American phase a few years ago but has built up

#### No Rules

Twenty of the core group of 50 actors are active, earning from \$75 to \$100 a day, and a top of \$15,000 a year. "It's who knows who and where you happen to be when they need you." Maggie Brenner says. There is no compulsory union, no rules for joining except talent. Sightreading, or the synchronist band

method, is used here. In Italy the method is a l'image, or lip sync, whereby the lines of each scene are memorized in advance.

The French group, who may be called to work out of town, prefer their own more chal-lenging system, but whether by way of compensation or not for a job requiring them to put their ego into somebody else's mouth (no credits, no security), they say they don't like dub-bing and refuse to see dubbed films, even their own. Especially their own.

Bruce Johansen, the author's voice in "La Modification," one of the few in the business who makes no claims for a stage career-he studied radio and TV production at Antioch and San Francisco State Collega and is leaving Paris soon to become a broadcasling execu-tive in Los Angeles—even ad-libbed some of bis role as Jean Trintignant in "A Man and a Woman," and never bothered to go to the movie. Friends told him he bad dona a good job. It seldom happens, either. that actors see the whole of a film in the studio. Carol Sands gives them a briefing before each scene and lets them bear the French only if they wish to (more accomplished actors, she says, prefer not to be influenced by the original). then the English script band is run right to left underneath, and the red recording light goes on. Actors stand up at the front mike behind a whita guardrail for interior scenes, at a rear mike for exteriors. In this tense smoke-filled space, they must feel sun, rain, love, hate, the works, without the pampering of props.

#### 'Lead' Voice

"It's a question of taking what the actress gives and making the most of it," says Maggie Brenner, who "appears" currently as the lead voice in the film "Madly," playing an American Negro girl speaking French. After finishing "La Modification," she switched to a Greek Western, in which the whole dubbing cast had to rewrite the script, originally done in English from a literal translation of the Greek. She has had a live stage career going for her as well but doesn't think dubbing necessarily advances it.

In the opinion of Barbara Sohmers (Sylva Koscina), currently seen onstage in Paris In Jean Anouith's "Ne Réreillez pas Madame," the best dubbing actor has what she calls an intellectual ability. "You must be relaxed to feel the person on the screen immediately. You hare to feel you are the character, as well as the actor who created the character. It's a double bind."

The actors take part in what seems to be nothing less than a giant crossword puzzle, switching accents, roles, styles in all combinations daily. It's not unusual, for instance, for a film to be post-synced by the original cast and then be dubbed for America, England, and "English-speaking" audi-ences, and into foreign languages

The trick in directing lies less in the actual comparison of the llps than in getting across a similar sense of emotion in the language, a job that for a perfectionist such as Carol Sands, can leave one crying on the cutting room floor, if after straining to get the best per-

#### Seal Stolen From Notre Dame Now in London

LONDON, Jan. 1 (AP).-The silver seal of Isabelle of Hai-naut, wife of King Philippe-Auguste of France, stolen from Notre-Dame Cathedral 100 years ago, has been bought by the British Museum from an anonymous collector who found it in a London jewelry shop. It went on exhibition yesterday. The 800-year-old treasure-

described by the museum as "one of the outstanding early medieval pieces of secular art" vanished in August, 1860, when theives raided the great Paris

the cover of the Tokyo Museum's catalogue of masterpieces.

the tremenlous drive that is being made for foreign markets, Peter Wilson, chairman of the Sotheby's board, initiated the trend, which eventually led to Sotheby's takeover of Parke-Bernet in New York Nearly 50 percent of the Sotheby turnover came from America this year. Sales were also held in Tokyo, Florence, Toronto and Zurich. Now Christle's is trying to build up a worldwide network of auction rooms. John Herbert, one of the Christle directors, says that directors and members of the staff made 400 trips abroad last year. Half of these were in search of works of art to be sold in

impression on fellow-auctioneers; overseas sales, he said, 'are s natural expansion of the world art market centered in London." This search for new sources of objets d'art and new markets reflects the dynamism of British auctioneers, as well us what is beginning to look like a minor crisis no the world art market. It is no longer enough to sit behind a desk and wield a hammer.

She has been taken by a young, cynical, nunk, flower-child actor to his pop-art home, where they play rock, take LSD and spiff oocaine. For the actress it is a first trip, for the boy it is a regular route. The boy, tough, natural and animalistic, sur-

vives. Miss Winters seems to suggest that only the cynical can exist in a cold world where idealism freezes over and only the selfknowledge of the self-seeker is

The ldess are not very original. The virgin Communist losing her virginity has the right awkward charm, but the film director facing his conscience and the successful film star facing her age have less convincing nemeses. The stories are out of True Confessions, They sound too much like the idly uninteresting gossip behind ona of those trivial nudging paragraphs by Hedda Hopper, commemorating well-known nonentities in deathly prose.

Yet at times Miss Winters does write well. She has an ear for the way people-at least sharp people-occasionally talk when trying to make an impression on a bedfellow or on life. The best part is the virgin, delightfully played by a gauch-ly ardent Sally Kirkland, swigging Southern Comfort and bringing her own contraceptives. And in the final passage, Diane Ladd, as the gracious Hollywood rictim of cultural shock, and Robert DeNiro as the AC DC. drug-popping swinging starict wbo is the cultural shocker, both

score. Patricia Carmichael has directed these non-musical beds with unobtrusive effectiveness, and Peter Harvey's settingthree rooms with an interesting cyclorama depicting places and world figures relevant to the particular bedtime story-is quite brilliantly and excellently lit by Roger Morgan. But someone should perhaps tell Mr. Harrey that Lyndon Baines Johnson is no longer the President of the United States. It is someone different nowadays.

Art in London: Sweeping Out the Traditions By Max Wykes-Joyce LONDON, Jan. 1. — Here at the year's turning is a good time to see how art in London is trending.

The large public galleries, backed by a vigorous Arts Council of Great Britain, have been ranging widely and into less known ways and seemingly will continue to do so. The Tate Gallery, for example, which has about a million visitors augually, has in the past two years given exhibition room to everything from American minimal art and Ambassador Walter Annenberg's personal collection to English Elizabethen art and the British father of pop, Richard Hamilton. Plans for 1971 ara equally en-

terprising-already scheduled is an Andy Warhol on five chosen themes—"Soup Cans," "Brillo Boxes," "Portraits," "Disasters" and "Flowers." Later in the year will be a show of the 60 works of the McAlpine British Scuipture of the Sixties collection. The Tate is branching out, too, in the publication of books, the most recent of which is an excellent study by assistant keeper William Veughan

of "Endymion Porter and William Dobson" (Tate Gallery Publications £1.10 — \$3.50) about the portrait, now in the Tate Gallery, of Endymion Porter, painted about 1643 by William Dobson.

The National Portrait Gallery starts off the New Year with an innovation, in the form of an exhibition of photo-portraits made by Godirey Argent for the National Photographic Record. And the opening exhibition at the Royal Academy of Arts is a great compilation of glories past and present from the famous Sezession Galerie in Vienna entitled "Secession: Art Nonvean to 1970."

Even more heartening are the small local anthority shows in London. One example is the borough of Harringay, where an anthology of British graphics in the 1960s is to be followed by exhibitions of paintings by two local residents.

Galleries

On the commercial gallery front, old master paintings, and first quality early English watercolors and drawings are hecoming increasingly difficult to acquire. The trend in gal-

leries and dealers specializing in such art works is therefore towards a permanent and slowly-changing show rather than the former three or four-a-year seasonal exhibitions.

In modern paintings and sculpture the comparative un-availability of large numbers of first-quality works leads to many more mixed shows, revirals and rediscoveries of obscure native talents, and of esoteric and rather remote foreign ar-

Among living artists, apart from the classical and traditional, to which a few galleries remain faithful, there is so much loosening of the bonds between painting and sculpture and graphics, so much experiment with new media, new concepts, that the conventional notion of a number of works ranged round the gallery walls, with an ordered catalogue and facile titling and explanations, is fast be-coming outmoded. Galleries are becoming increasingly sympathetic environments in which

art happenings take place. This makes living in 1971 hard for the dyed-in-the-wool tsome might say dead-in-the-

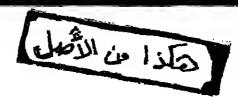

woodwork) "art lover"; but it brings us closer, and for the first time in five centuries, to the Renaissance ideal of the nomo universale, the artist as scientist, designer, estitele, plulosopher, poet, musician, man of action and man of the world all celled into one. Why not in-deed? There could be far worse aims and far inferior ways of encouraging it than the functioning of the art gellery as a lheater of life.

New York 'Four Americans In Paris'-A Look At the Steins

By Hilton Kramer EW YORK (NYT).-The athitisism railed Four Americans in Paris, which dargaret Potter bas organized at the Museum of Modern Art. thee its appeal is a little like the appeal of an old-farmoned novel one of those family rhamicles boasting a complex plot, vivid characters, sharp conflicts, and a denouement in which all the themes are recapitalisted and resolved. Rarely does an exhibition bring us, in addition to the pleasures to be found in really fine works of art, such rich associations and history and literary history is brought to life in this exhibition; a great era is recalled in it; and an extraordinary family drama is re-enacted. We are in the presence here of both great art and the romance of What Miss Potter has as-

sembled in this exhibition is the bulk approximately twothirds—of the collections of modern art formed by Gercrude Stein, her brothers Leo and in-aw Sarah Stein (Michael's wife) during their long residence in Paris. Over 200 works are included, the majority by Picesso and Matisse. Among them is a sufficient number of works of grees quality to put to rest forever the scoffing re-marks that have at times been voiced over the Steins' esthetic judgment. Whatever differcuess divided them and whatever their individual eccentricities, the Steins were the real -convoisseurs with a proaifinity for esthetic

#### Intelligence

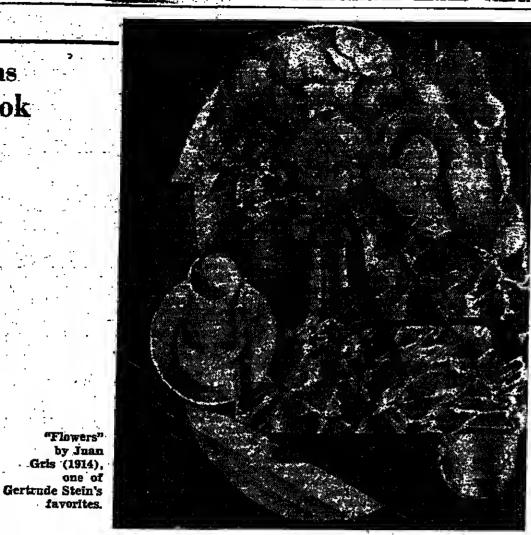

The collections were formed, for the most part, in the decade preceding World War Ithat halcyon era of the School of Paris when the discrepancy between the high artistic accomplishments of the avantgarde and public recognition and acceptance of them was at its greatest. This was the era Americans and Bussians, re sponded with a keeper intelligence and a more spontaneous lessure to the new art then the French themselves. And none responded with greater a acray than the Steins who soon became hisiders so far as concerned. The two Stein households in Paris-Gertrude and Legs at 27 Rue de Fleurus. Michiel and Sarah's 58 Rue Madame - became, in effect, the first museums of modern art. salons where important works by Picasso, Matisse and others could not only be seen but where they were also enthusiastically explained, presed, de-fended and otherwise spotheo-

Yet what contrasts of personality and point of view lia behind this passionate affinity for the new art. It was Leo Stein who led the way, studying the old masters and grasping early on the historic and esthetic relation that obtained between the work of Manet; Renoir, Degas, Cézanne and the early Matisse and Picasso on the one hand, and the vital traditions of Western painting on the other. What is essential to onderstand about Leo Stein, by far the most paradoxical and mysterious member of the Stein family, is precisely this et achment to tradition. It was this attachment that put him in touch with the new art in the first place, and it was this, too, that led to his ultimate repudiation of all modernist art. In the end, the closest thing to a spiritual home he rould find was the villa of Bernard Berenson. He could hard! have moved further from the intellectual atmosphere of 27 Rue de Peurus without abantioning European culture alto-

#### Boldest

It was Gerturde Stein who. after being faitlated into the mysteries of modernist art by Leo, proved to have the boldest Appetite for it. She was a modernist writer herself, of course, and she found in the painting she most admiredparticularly cubist painting— the stimulus and example for her own stylistic audacities. Whereas Leo Stein found in Ceranne and Repoir the synthesis of tradition and innovation he felt most at home with, Gerirude Stein saw in Picasso her true semblable. Her ambition was nothing less than to be the Picasso of American writing, to transform the language of Plaubert into an authentic and original American idiom the way Picasso had transformed the resources of Prench painting into the idjom of cultum. Her feeling for painting was certainly real, but one of the assential constituents of that feeling was precisely this sense of partisanship with to make her own.

In Leo Stein, we have a bril-lant, complex, turtured, confused artist manque who never pulse recovers his footing after his break with both Gartrude in art. In Gestricie

history in "The Autobiography of Alice B. Toklas"—a sure sign that Sarah Stein to conjure with.

#### Exhibition

Virtually all aspects of the Steins' collecting activities are represented in the 'Four Amer icans in Paris" exhibition, but it is Picasso and Matisse who dominate, of course. Over 100 works here are by Picasso, and aome 70-odd by Matisse. The group of cubist paintings and collages (including some super-lative examples of Juan Gris, another one of Gertrude Stein's favorites) is particularly strong, and the series of small land-scapes by Matisse a particular delight. But there is hardly a dull spot in the entire show. The early figure paintings of Picasso are marvels of charm, delicacy and poise-no match I think, for the cubist pictures, but wonderful in their own way. And besides the important pictures there are numerous informal drawings that, perhaps

still impart a sense of the am-biance in which the art was created and first admired. A few of the Cezannes are included, a few small Renoirs, a aingla Bonnard (a surprising picture unlike anything else in tha show), and, well, many other lovely things.

The exhibition also includes wall-size blow-ups of photo-graphs showing the salon at 27 Rue de Fleurus with many of its pictures, as it looked in its heyday. And there are pictures, too, of the interior of the house Michael and Sarah Stein commissioned Le Corbusier to design for them, a house that became a kind of Matisse museum for a

This is a beautiful show beautifully installed. The catalogue is itself a handsome production containing a great deal of valuable information on the Strins' individual careers and collections.

The exhibition remains in New York through March 1, and will later travel (in modified form) to Baltimore, San Francisco and Ottawa.

#### Emily Genauer.

# It Isn't Fair, It Isn't Just, It Isn't Sculpture

NEW YORK.—Think of the most "difficult," far-out work of sculpture yon've ever scen, read about or can remem-ber from published reproduc-

Maybe pop-artist Claes Oldenburg's warehouse-sized tollettank float he projected for bobbing on the surface of the Thames across from the Houses

#### Around the Roman Galleries

Drawings by Glovanni Fatteri from the Museo Civico Di Livorno, National Gallery of Modern Art, 131 Viale delie Bella Arti, Rome. Through

The marvelous prodigality of

French Impressionism has overshadowed all other national schools. One of its most important parallels was the Macchiaioll in Italy, of which one of the foremost exponents was Fattori (1825-1908). He was born of humble parents in Leghorn and after some years of study in Florence won the Ricasoli battle scene contest in 1859 with his version of the battle of Magenta. Whether it was this success or natural inclination, battles became his favorite eubject. (Though his rich output also consisted of cattle round-ups and fairs in the Maremma or friends grouped à la Boudin by the seashore.) Always the apparent bustle, the hurry, are caught in a calm allover fabric of movement. Masses of creatures and the silver dust they stir up run and merge toward the horizon. Sometimes a single figure stands unconcerned, or horse or man liewounded alone, though they are only used to offset the general motion, not as an anecdote. There are no heroes. Fattori's bettles are visual counterparts to such war descriptions as the ones in the "Charterhouse of

confusion The preparatory drawings that went into them show Fattori going at it with a sober

Parma" or "The Red Badge of

Courage." They are coolly ob-

jective appraisals of historic

workmanlike approach.

He has been called "the poet of human toll." But his compassion for animals is plain as well as seen here in a splendld series of struggling and dying horses, studies for "The Explosion of the Munitions Cart." In others, the deliberate observation, the sturdy line which delineates soldier and cowherd alike, considering workworn hands, every fold of fustian, hoof or harness with equal attention, make most informative reading. But several pages of battle sketches are the most vivid: Meshes of pen scribbles describing dynamic thrusts and tangles of bodies, make a fluid everall pictorial pattern. Compare them with the resulting canvases in the same museum: "The Battle of Custoza," hall of the Risorgimento, No. XV, and several smaller oils in the hall of the Marchiaioli, No. VIII.

Giorgio Morandi, Graphic Work from 1912-1961, Il Nuovo Torcoliere, 25 Via Allbert, Rome,

Morandi, the quiet inner strength of whose oils escapes many a hurried modern viewer spoiled by more spectacular fare, is seen here at his most splendid. His etchings, made of webs of line from grays to rich blacks, are tranquil and sparkling. People talk about the "bottle artist." There are lamps, boxes, vases, wild flowers, roses, houses as well. Sparse. poised, exactly posed-all these things look at you straight on -like the saints in older pic-The calm, the serene balance of placement sets ever more rarefled towards the end of Morandi's life. There is no mystery! It is simply that Mo-

randi considered the world be-

fore him with humility. Instead of superimposing his own shorteighted views, as most moderns do, he let it talk to him. This is what shines out from his beautiful work

Hans Bellmer, engraved illustra-tions, prints, Il Segno, 4 Via Capo Le Case, Rome, to Jan. 16.

Bellmer was born in 1902 in Kattowitz (then German East Prussia) and now lives in Paris. His extraordinary grooves and slits of the burin open up a world of erotic fantasy. It is as if splintering treebark, lacy fern and lichen uncuried to let you peek at the baroness, the high-heeled chambermaid, the nymphet from gothic fairytales hidden behind them. The tough tendrils of the incision line describe sexual rapture, intimate and secret details of feminine anatomy. The engraver's skill is admirable, but his imagination is avuncular, perverse and can only be attractive to those with similar special tastes.

# Is Expanding, **Fed Indicates**

Normal Year-End Call For Money Is Missing

By H. Erich Heinemann NEW YORK, Jan. 1 (NYT). Money and bank credit expanded at a moderate pace during the past few weeks, banking data published

yesterday showed. But the normal rear\_end demand for business loans at the money center banks failed to materialize, so that funds were in effect going begging in the money market during the final reek of 1970.

Indeed, the Federal Reserve System was forced to sell temporarily \$1 billion in treasury bills on Wednesday to prevent "sloppy" conditions from developing in the money market.

Even so, the eight largest New York City banks were able to borrow a record \$3.1 billion a day from other banks in the federal funds market at steadily declining interest rates.

Fed Funds Rate Drops

For the week as a whole, the average interest rate on federal -a hypersensitive indicator of credit conditions—was 4.83 percent down only slightly from the 4.84 percent average the previous week. But the average concealed the fact that on Wednesday, the pre-dominant rate on federal funds was only 3 percent, the lowest in sev-

The Fed said that the nation's money supply averaged \$214.4 bil-lion in the four weeks ended Dec. 23, up 5.3 percent from the average of \$203.6 billion in December, 1969. This appeared to be very close to tha money managers' target of "moderate" monetary expansion. monetary expansion. which was their policy through

most of last year. Total Habilities of Fed member banks—the so-called "adjusted bank credit proxy," which is used as an approximate measure of total bank credit—averaged \$330.1 billion, up 7.9 percent from the \$305.8 billion total in the four weeks ended

Dec. 34, 1969. As many money analysts have been noting recently, the slackness of loan demand has pushed the banks into heavy acquisitions of federal government and state and

# Credit in U.S. Nationalization—African Fact of Life

By Jim Hoagland

NAIROBI (WP).—Independent Africa's growing demands for control over key private industries and a bigger share of profits are reshaping. economic relationships on this continent.

Nationalization became a fact of business life in Africa in 1970. Foreign firms operating here realize they must learn to live with the trend of government takeover. Some are even learning to turn it to their advantage. A volley of takeovers in Zambia, Sierra Leone,

Uganda, Sudan and Somalia have produced some rules of the nationalization game for Africa which, if followed, could stabilize investment.

Equally important as the countries that did nationalize are the countries that did not. Kenya, Nigeria and the Congo (Kinshasa) indi-cated they will seek middle-of-the-road alterna-tives to nationalization, while the Ivory Coast, Gabon and the white-dominated countries of Southern Africa continued their wide open, Loissez-faire welcome to capitalism.

Zambia Is Pace Setter

Tiny Zambia, with its booming copper export business, has become the pace setter in develop-ing an African strategy of nationalization. A few weeks ago, President Kenneth Kaunda capped what he calls his "economic revolution" taking control of all foreign-owned banks. insurance companies, building societies and other major businesses in Zambia.

Mr Kamda lamched Africa's correct wave of nationalization in 1969 by "inviting" the two large and rich copper companies (owned primarily by Americans and white South Africans) to sell the government 51 percent of their shares. Sierra Leone Follows Lead Sierra Leone, a West African nation located

more than 3,000 miles from Zambia, followed the pattern in 1970 when it forced an English com-pany to negotiate away a 51 percent share in the nation's vital mining industry.

These two mining takeovers seem to have left scant bitterness between the investors and the

Management Fees Paid

In Zambia and Sierra Leone, the government is paying the foreign companies handsom-management fees to continue running the mines on a professional basis for the next decade Perhaps most significantly for the economic future of Africa, the Zambian takeover firmly established the principle of the government's paying for its share of the business out of future profits, usually in less than ten years, with the

debt backed by government bonds. The nationalizations in Uganda, Sudan and Somelia introduced variations on the Zambiar theme, with mixed but generally disappointing

Ugandan President Milton Obote seems to have decided on a nationalization policy only an houor two before he announced it. Negative reaction by foreign firms that began to look for alternative countries to invest in have made Mr. Obote retreat on some of his demands in the past few months. He has negotiated 50-51 partnerships with two large petroleum companies, guaranteeing prompt cash payments. has undoubtedly chilled much foreign investment

interest in Uganda. Somalis, faced with worsening economic prospects since a military coup in 1969, antagonized Italy, one of its main economic partners, by taking over Italian-owned banks, a sugar company, an electricity company and a petroleum firm, and offering inadequate compensation, according to the firms involved.

Awkward Sudan Performance

The Sudan turned in perhaps the most awkward performance. The military government tele-graphed its moves by choosing a symbolic date, the first anniversary of its seizure of power, to announce nationalization. Rumors of the move whitzed about Khartoum for weeks in advance and much money flowed out of the country in

anticipation.

It was a 100 percent takeover of banks insurance companies and major wholesaling and import businesses. There is a ten-year moratorium on compensation, which is to come in government bonds issued sgainst the local, nonconvertible currency. These terms are certain to discourage any new investment from Western sources.

One of the most important signs to emerge over the pest year is that nationalization in itself does not necessarily discourage foreign investors. Zambia has attracted new investment for at least six mining concessions being prospected by American, Japanese and other companies In Uganda, American Life Insurance is helping set up a company for which Uganda is putting up 60 percent of the capital Congo Kinshasa's generous settlement with Belgian mining interests

has sourced the investment there.

The nationalization drive is based on the feeling of African governments that they cannot allow foreigners to control their economies.

Convenient Political Tool

But there is more to nationalization African style than the desire to strike out at foreigners. President Kaunda has said that the government will take over Zambian-owned businesses that become large. The Sudanese takeover included locally owned banks, and a hank belonging to the government of Sudan's closest ally, Egypt. Taking majority control in foreign-operated

businesses is beginning to give content to what lave been largely empty declarations of economic independence by black Africa.

Ghana and Nigeria, both of which have seen state-owned enterprises operate inefficiently and record large losses, will probably resist the nationalization trend. Nigeria is likely to move over the next five to seven years toward a minority participation in its booming petroleum produc-tion industry, but present indications are that tha Nigerians will stop at 35 percent interest in the large existing oil companies.

exceptions such as Guinea · With notable French-speaking Africa divides into two general camps: Those countries like Upper Volta and Dahomey that have almost nothing worth nationalizing, and countries that are so busy raking in new investment that they have neither the time nor inclination to think about nationaliza-

# Minicar Plans At Chrysler Going Slowly

Needed Tool Orders Haven't Been Placed

By Larry O'Donnell DEFROIT, Jan. 1 (AP-DI).
Chrysler Corp. is not intreasing efforts to produce a domestically. ade subcompact to compets w mports, and some sources may \$ ompany may abandon the main Chrysler has confirmed eports that tooling orders for a Sources say the project has not been abandoned, but some say h may be ... Other sources in the company are doubtful that tooling orders will be placed soon.

Asked whethe the infroduction date had been pushed back from the January, 1972, target, or the auto scrapped, a Chrysler spokesman said he had "no further canment" beyond the statement that tooling orders had not yet been

Deferred Commitm

According to one informed source, Chrysler has brought development of the B429 auto to the point of cooling orders but deterred bly pending commitments on tooling Sources here held out several theories on thy Chrysler is moving

One is that the third largest U.S. auto maker wants to test its smallcar strategy before going into the heavy costs of bringing out a new small suto. The current strategy involves supplementing the existing compact auto-lineup with imports from Japan and Great British Chrysler is to start selling Jam-nese-made Dodge Colts and Britishbuilt Plymouth Crickets soon.

Watch Competition

Another is that Chrysler wants o see how well General Motors's Vega and Ford's Pinto do before proceeding with big spending on a direct competitor. The Pinto-Vega battle was 'elayed because of the GM strike. Marketing sources say they will not get details on that mpetition until next spring. Some financial analysis believ Chrysler is bolding back until it gets information on the profitpotential of U.S.-made minicars. "They are watching the realized prices on Pinto and Vega," said one analyst. "If they are econom-

cal, Chrysler could go ahead." Chrysler executives have been ambivalent abou. U.S.-make importcompetitors from the start. At first they were doubtful that the market would be big enough to support entries by all four U.S. anto makers as well as the independent

# Economic Putsch: An Analysis of Its Demise

By Leonard S. Silk DETROIT (NYT).—In the Soviet Union or Communist China, battles over Communist theory and ideology are waged by the top contenders for political power and usually foreshadow major shifts in national

in the United States, where economics is supposed to be a science, battles over capitalist theory and ideology are waged primarily within the learned

But these doctrinal hatties may be just as useful indicators of shifts in national policy as the ones among Communist

party chiefs. The most striking statement on economic theory during the recent American Economic As-sociation meeting here has turned out to be the lecture by Prof. Harry G. Johnson, who holds chairs at both the University of Chicago and the London School

Prof. Johnson made a slashing attack on the Chicago school of monetarism, of which his colleague, Prof. Milton Friedman, is the leader.

Mr. Johnson's attack was arresting because he has long been regarded as close to the monetarist school and because be has not been identified with the New Economists of the Kennedy-Johnson administrations, who have been the chief target

of the monetarist attack. Indeed, the monetarists have proclaimed that they have been running a counterrevolution against the Keynesian revolution of the New Economists.

But now Prof. Johnson has stated that the monetarist doctrines are analytically weak and politically handicapped. He predicts that Prof. Friedman's monetarist counterrevolution will peter out-end in fact has

circady begun to do so. Prof. Johnson said that the Friedmanian putsch was probably the first major attempt at a counterrevolution in Anglo-Saxon economics,

Professor's Attack on Monetarism May Presage Shift in U.S. Policy

Maynard Keynes zeroed in on the problem of unemployment and proposed a policy of raising government spending despite budget deficit to solve it. Classical economics had ignored the social problem of unemployment, assuming that full employment was a natural state for a free

Prof. Johnson says that, by the 1960s, the Keynesian revolution was ripe for a counter-revolution, because it in its turn d failed to solve the problem

The Friedmanian doctrines, in essence, represented an updating of the old quantity theory of money, which goes back long before Adam Smith.

Its cardinal tenet was that moderate and steady growth in the money supply would solve the problems of inflation and memployment, and that the money supply was far more im-portant than tax and budget changes as determinates of the level of economic activity and

The monetarists had to wait for the moment when their counterrevolution would have strong political support. It came with the escalation of the Viet-nam war in 1965 and the failure of the New Economists—the Keynesians—to control inflation.

The Keynesian defense was that is was not the economists who had falled but the politi-cians, who spent too much and taxed too little. However, an economie test

came with the passage of the surtax in 1968. When it failed to check inflation, the New Economics suffered a heavy blow. In fact, Vietnam and infla-

tion helped to bring the Mixon administration to power—and with it the monetarists, called new new economists, who were its principal economic advisers. Now, two years after the counterrevolutionists' move into the White House, Prof. Johnson says that monetarism is beginning to fade for two reasons:

6 The monetarists are wrong and the Keynesians right in their view that inflation is a fer less serious social problem than unemployment.

Prof. Johnson believes that "either we will vanguish infla-tion et relatively little cost, or we will get used to it." The odds are that we will of solving other pressing do-mestic issues—this seems to be the current view of the present administration ...

● Monetarism 'Is seriously inadequate as an approach to monetary theory, judged by pre-yalling standards of academic

In the course of achieving scientific respectability, he says, monetarism will have to "compromise bretrievably with its Keynesian opposition."

The most serious defect of monetarism as an analytical system, says Prof. Johnson, is that it evades the problem of predicting what the level of out-put employment and prices will be. All it claims to do is to relate the supply of money to the future amount of total

spending.
In fact, the administration's program of slow monetary growth had virtually its entire effect during its first two years in stopping the real growth of the economy, in raising the level of unemployment, but with very little effect on inflation indeed with escalation of inflation for many months.

This impact upon prices, oot

put, and employment was not expected by the administration and cost it dearly at the polls. Black Box Methods

In addition, says Prof. Johnson, monetarism must drop its "black box"—or "positive"—methodology. Most economists, he says, distrust results that "appear like rabbits out of a conjurer's hat—and an old-fashioned top-hat at that."

The monetarists in Washing-

ton would deny that they ere stuck with inflation as their primary policy goal, rather than full employment.

Earlier, men like Herbert Stein of the Council of Economic Advisers, were willing to argue for very rapid rates of monetary growth to restore full employment before the 1972

However, at the moment a counterattack on the political importance of memployment relative to inflation is being pressed by some members of the White House guard.

Similarly, the Keynesians within the Democratic party strongly deny that they are concerned only about unemployment rather then inflation. But the real issue is whether Key-nesianism inherently has an inflationary bias and Friedman-ism an unemployment bias. Better, But Not a Great Year

#### Greater future income can be the goal of a \$5,000 portfolio placed under management now

If the money you have today is to grow in the future toward more income, or for education, travel, leisure, retirement, it must be kept working full timo to achieve your goals. Yet you may find that you are actually losing ground doe

to inflation, taxes or lack of time for investment decisions. To help solve this problem, clients in 55 countries have turned to The Danforth Associates Investment Management Plan. It has, we believe, proyed especially efficient in providing continuing capital growth supervision for portfolios of from \$5,000 to \$50,000 - on behalf of people who recognize and can share the risks and rewards of common stock investments. The cost is modest, as low as \$100 per year.

For a complimentary copy of a 42-page report describing this tested plan, its complete 10-year "performance record," and how it may help you now, simply write Dept. 81-59

#### THE LAST OF THE GIANTS

By C. L. Sulzberger, Macmillan. 1,000 pp. Illustrated \$12.50. Reviewed by Robert Kirsch

YN October of 1954, C. L. Sulzberger began his column, Foreign Affairs, for The New Work Times and, in his own words, "ceased being a reporter and became a journalist." Fortunately, he did not put aside the advice of his first city

editor: "Keep your ears open and your mouth shut." For nearly a decade, he traveled and met with the great and the prominent of the world, with hoboes and kings. Presidents and Pathan tribesmen.

"There is much to be said for looking expectantly at a man and waiting for him to speak," he writes in "The Lest of the Giants." Much, indeed. For it is that technique which fed his voluminous and meticulous notebooks and produced this faccinating 1,000-page book of revealing conversations. It covers the years 1954 to 1963 and is a sequel to his "A Long Row of Candles."

Most of the material given here could not be used in his column at the time. The acceleration of history makes it hlur with journalism. Confidences given scarcely a decade ago can be revealed.

There remains the question: Why did so many reveal to a why him so many reveal to a practicing journalist so much of what appears to be their private thinking, often in contrast to their public acts and utterances? It may be some-thing I would call the Boswell factor; an aura, an attitude, a stance which appeals to those who want a personal voice to be heard in history. Whatever it is, Sulzberger has

it. He believes in the biographical approach to history, and carries it over to journalism. "My own belief places more stock in human qualities human judgment, human decision and the capacity of man to exceed his expectations and avoid the terrible rictus of disaster.". he. writes.

In the account itself, one learns to trust Sulzberger's assessments of the men he speaks with Michel Aflak, founder and secretary-general of the Ba'ath party, "is supposed to be a great intellectual, but he struck me as a pretty third-rate character." But their words are in the end the central course of the book. There is a certain amount of

posturing and fantasy. Some-

times it is herd to make out the difference: Malraux, "terri-brilliant Malraux, who by then is speaking a kind of French shorthand, I long for the com-De Gaulle is the central figure of this book. With Churchill, who had "already fulfilled his role," he is among the last of the glants. Churchill is old, tired, fading but still capable in 1956 of coming fully alive. "It was like watching a very

strong light bulb during an

electrical crisis: First a faint reddening of the filament, then a flickering, then a glow, and then a brilliant blaze of light. finally, after being blinded by the sustained glare, again flick-ering, subsiding, just a red fila-ment; then nothing."

De Gaulle in these pages is still at the height: remote, eloquent, magisterial. He makes history his own. Eisenhower: "...He is not a giant." Khrush-chev: "He is a little man who makes specthea." President Kennedy: 'History will prob-ably say that he was a man of great ability who laked the

time to prove himself." Virtually everyone of impor-tance is here: Nehru, Nasser, Nixon, Pompidou, Tito, Adenauer, King Hussein. Yet, it is De Gaulle who dominates, not so much because of his power, but because of his personality. Obviously this lonely and austere man regarded Sulzberger as a friend, trusted him with such confidences as his willingness to consider returning to head France by a coup d'état.
Rich in detail, the volume is

fascinating reading. It is not history but the raw material of history. Thus, it has to be read not simply as an expose but as a counterpoint.

Occasionally one can see the

direct root. Dayan, a halfdozen years before the war of 1967, says that Israel might be forced to start a war "if there were any massive build-up in the United Arab Republic clear-ly directed toward Israel." Hus-sein seems to foreshadow his action against the Palestine commandos in his remarks about the security of his country.

Some of it is gossip and occasionally one senses that a leader may be trying to use the reporter. But an incredible proportion of this material involves an intimate look at the thinking and beliefs of those whom Sulzberger met with in the course of his work. C Los Angeles Times

Mr. Kirsch is book critic of the Los Angeles Times.

#### Feminists Occupy

New York Building NEW YORK, Jan. 1 (UPI).— Some 100 feminists early today took over an abandoned citr-

owned building in the East Village that had been a women's shelter and said it would be opened for use by women.
"With this action, we're now

joining in solidarity with our sisters who are squatters throughout the city in an attempt to get decent boosing." a spokesman for the women said:

The occupiers of the building plan to establish a health clinic. child care center, lesbian center, feminist schools, art work shop. a temporary home for released prisoners and a food co-op.

# NFL Playoffs 1 Away from Super Stage

### Morton's Poor Showings In Clutch Worry Dallas

By William N. Wallace

NEW YORK, Jan. 1 (NYT).—Most pro football experts and the dsmakers favor San Francisco over Dallas for the National Conference championship on Sunday. The single reason revolves around quarterbacks—not that the 49ers' John Brodie is likely to be so good but that the Cowboys' Craig Morton might be so bad, Few people would cott completed 24 of 46 passes kick a 42-yard field goal with 59 that chance on its 84-yard drive sixth pro season at age 27, Morton has a history of failure in playoff 306 yards with his receivers seconds to play to gain a 24-24 tie and was successful, but failed games. It is the ability of his teammates like all-pro candidates Bob stantly cluding the bewildered with Alabama in the 12th Astro-twice in the second half to pre-Lilly, Mel Renfro and John Niland that brings Morton to these big con defenders. strongly about it, why don't you write the President a letter?"

To Judge Carswell, "Even if they won't Bnehwald have you on the Supreme Court. you're a cincb to be elected senator.' To Sen. Charles Goodell, "The

#### Chubby Children Prone to Colds, Study Suggests

LONDON, Jan. 1 (AP).— Chubby boys and girls appear to catch more colds than children of average weight, researchers said today.

Doctors from Northampton General Hospital and the county child health department reported in the British Medical Journal on a study of 120 overweight children aged three months to two years, and 103 children of normal weight.

The study found that more than a third of the overweight children had suffered from colds serious enough to require a doctor's care, compared with less than a quarter of the thin-

ner children. The doctors said the link between weight and colds is uncertain but suggested three possibilities: Overweight leads to impaired breathing so that fat babies cannot clear their hings easily, extra pounds lessen the body's inbuilt defenses against disease, and fat hebies are not breast-fed ae long as thinner

Mother's milk seems to help bables fight disease, the doc-tors said.

#### 'Pattou' Cited as Best Film of 1970

NEW YORK, Jan. 1 (UPI) .-"Patton" was chosen as the best motion picture of 1970 and "The Wild Child" as the best foreignlanguage film, the National Board of Review of Motion Pictures announced today.

The board inaugurated the practice of annually selecting the best films 51 years ago. President and Vice-President have to support you. After all, you are a Republican. To Bernie Cornfeld of IOS, They can't fire you, Bernie,

It's your company, isn't it?" To Howard Hughes. "You either do it my way, Mr. Hughes, To Secretary of the Treasury David Kennedy, "All we have to do is lay off people and we'll

stop inflation." To the president of General Motors, "The union will never strike. They need the jobs." To the president of the United Auto Workers, "The company will never close down. They

need the business."

To a general in the Pentagon, "There is no possible way of anyone finding out that we keep files on American civilians."

To former Gov. William Scranton, chairman of the Commission on Student Unrest, Hey, why don't we send an advance copy of the report to Spiro Agnew?"
To Secretary of Defense Mel-

vin Laird, "We think we've found the underground command headquarters of COSVN in Cambodia."

To Richard Nixon, "Mr. President, our people are absolutely certain they have found the command headquarters of COSVN in Cam-

To the American people, "We are going in to wipe out the command headquarters of COSVN in Cambodie."

To the president of the Penn Central Railroad, "Why don't we hire Nixon's old law firm to handle our deficit problems?" To e publisher who turned down Dr. David Reuben's hook, "Everything You Always Wanted to Know About Sex," "Boss I don't see any market for a

### James Mason Goes Back To Shakespeare's Prospero

PARIS.-Over the past year one of the hottest screen properties has become Shakespeare's "The Tempest," of all things. Sir John Gielgud announced that he would play Prospero under Richard Attenborough's direction, next it was bruited about that Rex Harrison would star and that Christopher Miles, among others, would direct. Front runner and likely winner is James Mason with adapter-director Michael Powell.

Mr. Mason has already grown his Prospero beard-it goes charmingly with his Mickey Mouse wristwatch-and European sources have supplied the necessary money. There's nothing disastrous that can happen at this moment." Mr. Mason says. Shooting is to begin in March or April, probably

in Italy. Mia Farrow will play Ariel, Helen Mirren will be Miranda,

#### Mary Blume

and Peter O'Toole, who was to he Caliban, won't he. Andre Previn is writing the score and cartoonist Gerald Scarle is designing the production. The adaptation by Michael ("The Red Shoes") Powell is absolutely magical, James Mason says, though it sounds as if "The Tempest" may have suffered a sea-change: "We want to make it into a marvelous science-fiction spectacle with music,"

Mr. Mason says.
"It will be very visual. There will be a visualization of the usurpation of Prospero's dukedom to cut down on the boring exposition be gives to poor Miranda in the first act.

"There are lots of passages that are obscure even to scholars.

We don't want to keep people vacant in their seats while the sound track goes by with obscure passages—we'll cut or emphasize the visual impact so they won't really hear."

For those who want to make Shekespeare "modern." "The Tempest" is a natural. Way back in the forties e black actor played Caliban and a heavily sarcastic "O brave new world" from Miranda is quite OK, Jonathan Miller's recent London production emphasized "The Tempest" as a study of colonialism. Mr. Mason isn't the slightest bit interested in heavy re-interpretation:

There's a great deal of content that could be applied to modern thought," he says, "but we're not going to make any tricky analogies." James Mason played Prospero at the Old Vic's children's

matiness in the 1933-34 season (the grown-ups' Prospero was Charles Laughton). His only Shakespeare film has been the Joseph Mankiewicz "Julius Caesar" (1953) in which he was a fine 

"We want to make 'The Tempest' into a mar-

velous science-fiction

spectacle with music."

Brutus. "There is," he says, "no reason wby you shouldn't film Shakespeare sometimes."

In fact, he adds, Shakespeare can even be financially suc-

cessful. "The three Laurence Oliviers have been successful, the two Zeffirellis, the Japanese 'Macbeth,' the Russian 'Hamlet,' our own original 'J. Caesar'." Unfortunately these hits have been forgotten among flop television productions and such oddities as the Charlton Heston "Julius Caesar."

"I may add acidly," Mr. Mason added acidly, "that there are forces out to destroy the great English works. The film of David Copperfield—they got all the Sirs and Dame Edith, and everyone thought it must be good. It was one of the most monstrous defamations of Dickens's talent, a real shocker.

"I say it acidly," Mr. Mason added, "because I was planning to do 'Jane Eyre.' Just when the script was bang on, I found out 'Jane Eyre' was being done—by the same team that gave us David Copperfield'."

Of the Shakespeare films that he has seen, Mr. Mason prefers Olivier's "Henry V." 'It was wonderful theater. I also loved the Russian Hamlet, though it's not fair because I can't tell how well it was adapted. My Russian friends said the Pasternak translation was either wonderful or terrible and vulgar, depending on their political attitudes.

"Zeffirelli's Romeo'—some parts were marvelous. But with actors that young you lose what you can get out of the fourth and fifth acts." The critics, if they had done their job properly, should have said you should have left off the film when Romeo

Mr. Mason didn't see the National Theatre's all-male, "As You Like It," but thinks it would be good to do "The Taming of the Shrew" with boys playing girls "because it's such a horrid play the way it's usually done. It was very well done with Liz and Richard, but the fact that Richard played it very well made it even more horrid.

"Doing it as a men's room joke on the opposite sex." Mr. Mason said, "may make it a fun evening."

# PEOPLE:

It was the usual year-end greeting card, addressed to Mrs Elleen Newell and inscribed Happy Xmas and Happy New Year. For Mrs. Newell, however, it was a great deal less than she had expected for which a silent prayer might be offered. The card, written on the back of an airline ticket, was signed by Leila Khaled, the Arah hijacking queen, and Mrs. Newell, 53, the astonished ad-dressee, is the matron of London's Ealing police station where the glamorous guerrilla had been kept prisoner during last September's Middle East crists. "I was actually expecting her to send a hand grenade," said Mrs. Newell yesterday. "She promised to send one for the Christmas tree." When she first came to the station she was cold and aloof." recalled the matron, "but after a time she started to chat with us. We used to keep her happy by playing cards with her. She

In Dunfermine, Scotland, Joe Jardine, 66, played 48 holes of rolf Thursday to bring his total for 1970 to 8,925 holes. Joe estimated that he had taken some 48,000 strokes to negotiate the marathon, at a cost of only 24 lost balls.

even played badminton, and be-

fore she left, she told us she

had enjoyed her stay. She was just a nice, homely girl. Of

course, she was homesick."

"Times have changed," de-clared Anthony Williams, chief executive of the British Associated Fisheries Catering Division, this week, and a portion of fried fish and French fries wrapped to take out in an old newspaper just isn't in touch with today. "Fish, and chips are no longer a staple, auto-matic weekly purchase." wrote Williams in the division's trade paper. "We must compete for our share of the housewife's purse today and much more in the future." A start could be made by revamping the "soggy" image of shops where fish and chips are sold, he said. Move them onto main streets, make them bright and fashy, with trendy decor to compete with the pizzerias, Chinese take-out restaurants and hamburger palaces. And, oh yes—'Wrap the fish in something besides newspapers." ...

In Milan, Tina Egeria, one of Italy's best-known seers, yesterday predicted that 1971 will see the resignation of Generalissimo Franco, followed by danger of revolution which will be counSeason's Greetings From Leila.

# Florida Disney World to Open This Year

By Jon Nordheimer LAKE BUENA VISTA. Fig.,

(NYT).-Out of the muck and matted tangle of cypress and palmetto trees, the stateiv spires of Cinderella's castle spring into the Florida sky. waiting to welcome a story-book princess and 10 million visitors a year.

To the president of the Shell Oil Co., "We have a small leak in one of our wells off the coast Walt Disney World, a monument in gingerbread to the creator of Mickey Mouse and a clutch of other childhood favorites, is taking shape in the in-"Someone is on the phone, ask-ing if you want to renew your terior of Florida, 16 miles southwest of Orlando. After eight years of planning,

Come and pay us a visit

construction is under way in the biggest nongovernmental project in the world, with 4,000 workmen engaged in creating a land-

scape designed to send shivers of excitement through the young and old of Middle America.

The success of the Disney World will depend, however, on several factors apart from the public enthusiasm already set in motion by the popularity of its counterpart outside Los Angeles, Disneyland, A main one will be the health of the national economy.

Florida, the state with the second fastest rate of population growth in the last decade, after Nevada, has under seven million permanent residents. Therefore, Disney World will have to attract a sizable share of the 22 million out-of-state motorists who travel 509 to 2,000 miles each year to reach Florida.

A continuing sluggish economy could effectively shut it off from its customers if Americans are forced to curtail holiday travel. The climate of central Florida

has raised other questions. "We have to learn to operate all over again," said Roy Disney, brother of the late creative genius, Walt, who died in 1963 shortly after divulging his plans for Disney World. 'It'e different from California where we could use that beautiful climate most of the year. We're doing everything possible to fight the hot weather. We are experimenting with cool air, for example, used not only to cool an area but also

to throw up a barrier to keep ougs out of an attraction." But happy endings are a Dis-

ney trademark and backers of the \$306-million development, scheduled for opening in Octoper, are confident that the inrestment will be hugely profitthle for the parent company, Walt Disney Productions, and the state. Roy Disney, the 77-year-old board chairman of Walt Disney

Productions, estimated in an interview here last week that the 37,500 acres of land purchased five years ago as the site for Disney World would now have a market value of \$1 billion.
